45. How You Benefit From the Always SafeMoney Affiliate Program

"Your Conservative Approach to Managed Futures"
Risk and/or Investment Management - Trading Manager -
Business Development – Investment Guides – Research – DataBase

This article describes how The Always SafeMoney Affiliate Program benefits the managed futures marketplace and all affiliates. Because there are no registration requirements, outstanding income potential is available for national and international financial service professionals, broker-dealers, and investment related media, both electronic and print.

Who Can Benefit:

The Affiliate Program can be especially profitable for investment and financial media, commodity exchanges and trade associations, futures commission merchants, commodity trading advisors and pool operators, hedge funds that use managed futures, free lance writers, broker-dealers, independent advisors and financial service professionals involved with asset management. Investors as referral affiliates, investment clubs and sponsors of investment clubs can also benefit.

Independent advisors and financial service professionals involved with asset management can increase their traditional fee based revenue by integrating selected aspects of managed futures into the composite investment portfolios currently offered. The Free Mini Course for Advisors communicates an impeccable foundation.
<http://www.always safemoney metrics.com/free.htm>

Series 3 professionals already involved with managed futures can forge durable relationships with their current and potential marketplace by significantly improving upon their current risk management and client education procedures.

Text below was taken from
<http://www.always safemoney metrics.com/affiliate/affiliate.htm>

Benefits and Value Added

For All Affiliates
Compensation

Affiliates receive 22% of the gross fees. Referral Fees are 9%. The fee structure was developed to easily accommodate mass marketing through groups. When there is no Referral Fee involved, any affiliate can keep the total 31% commission for him/herself. The composite 31% can become a customized split for broker-dealers, futures commission merchants, commodity exchanges, banks clearing other banks involved with asset management, investment media including web sites, trade magazines and other institutions that have a network of marketing agents.

The "Unspoken Contribution" to Society

- Dramatically improve advisor selection standards.
- Optimize the positive potential of managed futures by redefining relevant analytical and benchmark applications.
- Improve the accuracy and relevancy of marketing information currently used for managed futures.
- Teach people to stabilize composite equity based portfolios with prudent integration of managed futures.
- Allow only the finest quality from the managed futures industry to reach institutions and the investing public!

Free Services Build Trust and Spiritual Strength

<http://www.alwaysafemoneymetrics.com/affiliate/affiliate.htm>

~~~~~  
If you happen to be an investment advisor, broker dealer, financial institution, or a securities registered professional, you can significantly benefit from building yourself a managed futures profit center. See <http://www.sanctity.com> Business Development.  
~~~~~

For All Investors

If comfortable refer Always SafeMoney to anyone who can reach a large audience, you can be compensated for referring the service.

For Investment Clubs or Sponsors of Investment Clubs

Contrary to 'erroneous beliefs' that managed futures are too risky for mere mortals. Investors worldwide are becoming familiar with the marketplace. Twenty years ago I was a member of an investment club that integrated managed futures into their investment strategy. My job was futures.

Our team developed a turnkey strategy that allows people to form private limited risk investments. We provide the documents, accounting software. Their only cost is state filing fees. The structure allows all people equal access to advisors that are normally only available to wealthy investors and institutions.

For Futures Commission Merchants (FCM'S)

The program is perfect for Futures Commission Merchants currently involved with managed futures. Services improve traditional risk management and analytical processes. Client education builds understanding, comfort and trust that will endure throughout the relationship, *if you remember to treat all people as you wish to be treated*. Good will and honor are priceless, especially when so much corruption is being purged from financial and legal services.

For FCM's Clearing Institutional Managed Futures Accounts

1. Because of its ability to reveal information that prevents ill-fated losses, all managed futures clients can benefit from SafeMoneyMetrics™ Risk Management. (Applied to each account after it begins trading). Look at <http://www.safemoneymetrics.com/futures/futures.htm>

For FCM's With a Network of Introducing Brokers

1. The combined 31% compensation can be a customized split
2. Unwanted compliance problems are dramatically reduced
3. The impeccable client education and risk management services provide superior and unique marketplace positioning
4. Private label business development services are available for participating IB's at no cost to the FCM

For Commodity Pool Operators and Trading Advisors

SafeMoneyMetrics™ improves the advisor selection and on-going risk management process. Investor relations will dramatically improve if CPO's and CTA's integrated Always SafeMoney as an elective service into their risk management and marketing strategy.

CTA's willing to integrate SafeMoneyMetrics™, as a third party risk management elective will prove themselves superior to the mediocrity that probably permeates too much of the industry.

For National and International Commodity Exchanges and Trade Related Associations

(We need people having multi-lingual capabilities). Member firms of all commodity exchanges involved with managed futures need SafeMoneyMetrics™ and the information offered by Always SafeMoney. The managed futures marketplace directly being educated by Commodity Exchanges and Trade Associations also needs SafeMoneyMetrics™ and related educational services.

For Independent Advisors and Broker–Dealers

The FREE Mini Course for Business Development is indispensable and was created for broker-dealers.

<http://www.alwaysafemoneymetrics.com/free.htm>

SafeMoneyMetrics™ for Managed Futures, if integrated into already existing services will strengthen your compliance, risk management and marketing efforts at lower cost and risk.

We build private label profit centers in managed futures for distribution to your investment advisor network. (see [www.sanctity.com / Business Development](http://www.sanctity.com/BusinessDevelopment)) - Increased traditional fee based revenue is a by-product.

For Financial Media (Print and Electronic)

We will co-develop educational and research projects for any marketplace offering consistency. The monthly SafeMoney advisor rankings, articles and periodic research reports offer impeccable editorial content.

For Free Lance Writers

The affiliate program allows you to benefit from business resulting from your well-placed articles. Because SMM is so unique in its ability to protect people from unwanted losses; 'messengers of good fortune' are well received by their audience and favorably compensated by the universe.

We can also co-ordinate PR services for you with active affiliates.

Our ability to constantly produce new and useful information for your marketplace allows the potential for unlimited upside. The marketplace is international and growing. People who can break language barriers are needed and especially welcome!

The marketplace ASM benefits, services offered and revenue profiles are detailed at

<http://www.alwaysafemoneymetrics.com/affiliate/affiliate.htm>

For Software Companies

Traditional software vendors have a marketplace of investment advisors. Many clients have already or will be moving into managed futures. The managed futures industry will grow to the degree that we produce profitability at reasonable risk.

SafeMoneyMetrics™ is a direct analytical approach to managed futures. Its capacity to reveal superior trading advisors and prevent ill-fated losses makes it an essential addition to any traditional risk management process. The statement is supported by facts efficiently summarized in the press release available at:

<http://www.sanctity.com>

<http://www.safemoneymetrics.com> or

<http://www.alwaysafemoneymetrics.com>

- Increased revenue with no out of pocket costs
- Private label services
- Unique marketplace positioning
- Potential entree' into places that might otherwise remain closed or be traditionally competitive.

The Affiliate Program is managed by Managed Affiliate Programs

<http://managedaffiliateprograms.com/start.php?affid=1018> (MAP)

All affiliates can access their accounts 24 hours a day through MAP.
